

R for Data Analysis and Visualization

(Data with R) With Examples from Public Health and Epidemiology

SI Analytics

Table of contents

Introduction

This book is a compilation of lesson notes for a structured, multi-week online training program offered by Strategic Insights and Analytics (SI Analytics). To access the accompanying lesson videos, practice datasets, exercises, and additional learning resources, please visit our website at sianalytics.org.

Strategic Insights and Analytics (SI Analytics) is a professional training and analytics organization focused on building practical data analysis, visualization, and decision-intelligence capacity. Through a combination of instructor-led bootcamps, self-paced courses, and applied project support, SI Analytics equips individuals and organizations with the skills needed to translate data into actionable insight across business, public sector, and global development contexts.
